

**In the Specification:**

Please amend the paragraph beginning on page 4, line 33 of the specification as follows:

The present invention is described below with reference to block diagrams and display illustrations that illustrate methods, apparatus and computer program products according to some embodiments of the invention. It will be understood that block diagrams and screen displays can be implemented in code that may be provided, for example, to a processor of a portable electronic device, such as a cellphone, personal digital assistant (PDA), pager, e-book reader, or the like, to produce a machine, such that the code, when processed by the processor, embodies data structures and/or means for implementing acts specified in the figures. Such code may also be embodied in a storage medium, such as a random access memory (RAM), a programmable read-only memory (PROM), memory stick, SIM card, web server or the like, ~~or a signal propagation medium, such as a wireline or wireless signal propagation medium over which code may be transferred,~~ that can direct a processor to operate in a particular manner, such that the instructions embodied in the storage ~~or propagation medium~~ produce an article of manufacture including code configured to implement the data structures and or acts specified in the figures. The code may also be loaded onto a processor to cause a series of operational steps to be performed on the processor to produce a process such that the code executed on the processor implements the acts specified in the figures.
